

Step 1: Export Your Metadata from forScore

1. Open **forScore**.
2. Tap the **Backup** menu (under the suitcase tools).
3. Tap the small “**scroll**” icon (the slightly hidden export button).
4. Choose **Export**.
5. Save the exported file to Files, iCloud, or wherever you can access it.

This CSV file contains your library’s metadata.

Step 2: Import the CSV into TidyScore

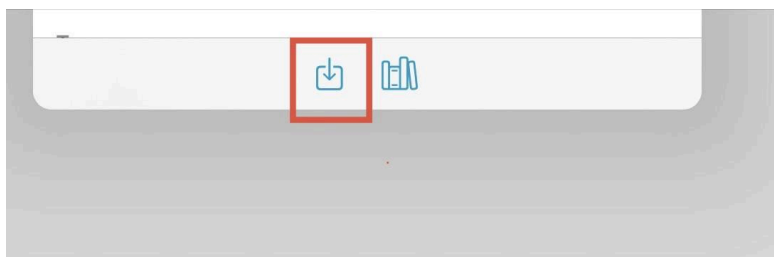

1. Open **TidyScore**.
2. Upload the CSV file you just exported.
3. Make your desired metadata edits or run your cleanup tools.
4. When finished, export the **updated CSV** from TidyScore.

This exported file is your cleaned metadata file.

Step 3: Import the Updated File Back into forScore

1. Return to **forScore**.
2. Under the music note button, select ‘**Import**’.
3. Select the updated CSV file you exported from TidyScore.

⚠ Don’t worry if nothing appears to change immediately — that’s normal.

Step 4: Apply the Imported Metadata

After importing:

1. Go back to the **Backups** screen.
2. Tap the “**scroll**” **icon** again.
3. Select **Import** this time!
4. Choose the file and confirm.

This final step applies the metadata updates to your library.
